

# Cash Processing Solutions (CPS)

## Driving self-sufficiency and eliminating legacy inefficiencies for a divested organisation

CPS is a global organisation supporting customers in more than 100 countries, providing complete cash centre consultancy, data & software solutions and sorting machines. Covering the entire cash lifecycle from production to destruction.

### Company at a Glance

Industry : Manufacturing  
Location : Global  
Size : 500 Users  
Turnover : £49.3m pa  
Website : www.cps.world

## The Challenge

Following an extensive review of core strategy, De La Rue plc group concluded that CPS was an element of their non-core operations and as a result was divested from the group into a wholly independent entity. The challenge was to separate CPS's IT from the on-premise group IT estate, and establish its own cloud-based estate providing controlled transformation to eliminate inefficiencies, decrease operational costs whilst maintaining business continuity.

## How did we help?

- Consultative engagement reviewing the initial IT estate and identifying core IT requirements.
- End-user digital transformation with the implementation of modern-office solutions.
- Design of the new cloud-based IT infrastructure with integrated zero-trust security.
- Strategic support and monitoring services throughout the full divestiture process.

### Intelligent Services:

- ➔ Advisory
- ➔ Hosting & Cloud
- ➔ Security & EndPoint Mgt
- ➔ Devices & Licensing
- ➔ Productivity Solutions
- ➔ Apps & Automation
- ➔ Managed Service / Support

## Achievements

### Separation & Migration

Over just 3 months from initial engagement. The new IT estate was designed and implemented. Including Azure Landing Zones, Active Directory, PKI environments and the initial migration of all existing legacy IT.

### Modern Workplace

Deployment of Windows 10 using System Centre Configuration Management and Exchange online with the migration of over 500 mailboxes without any impact to business continuity.

### Transformation

Numerous legacy SharePoint farms and file shares were migrated to a combination of SharePoint Online and OneDrive for Business, improving employee collaboration and efficiency.

*With exemplarily experience in supporting organisations undergoing core structural change through divestitures or mergers. We pride ourselves on building effective and trusted partnerships with our customers, delivering intelligent, targeted and considered IT solutions ensuring business continuity at a time when you most need it.*

## Impacts

Organisational IT agility stemming from the new cloud first approach to all IT decisions.

Reduced on-going maintenance costs associated with legacy IT, and improved cost transparency, management and forecasting.

Boosted collaboration and zero-trust security spanning the entire organisation.
